I am a Front End developer and Javascript mentor with +2.5 years of experience developing web applications using Html, CSS, WordPress, Javascript, React.js. Working under Agile methodologies such as SCRUM. I also have experience in UI and UX Design. I am a self-taught enthusiast and passionate about programming and Stack Javascript. I am constantly looking for new challenges to keep growing professionally and be able to apply them every day.

EXPERIENCE

Match, Web developer — *NOV, 2022 - APR, 2023*
- I managed developments from scratch starting with Figma design, working together with UX&UI designers.
- I developed a website from scratch using CMS WordPress and Custom Theme.
- I was in charge of the SEO optimization of different client sites. I managed to increase overall organic traffic by at least 40%.
- Managed and optimized e-commerce in Shopify and Woocommerce, product upload, and database management.
- I worked using Scrum methodology and uploaded and managed hours and projects in Jira.

Tech Stack: HTML, CSS, PHP, JavaScript, SQL, Bootstraps, Tailwind, WordPress with Woocommerce, Shopify.

Air Computers, Frontend developer — *MAR, 2020 - AGU, 2022*
- My first complete goal was to improve the loading time of the web pages with an image optimizer and a preloader.
- We rewrote functional component code to improve the UI performance of the current institutional app by 80%.
- Increased the company's e-commerce sales with my proposal of rebranding the brand and creating a new user experience using React.js & TailwindCSS as leading technologies.
- I connected the company's product database with the virtual stores of different clients, I also supported different implementations and new functionalities required.
- Developed a complete web application to store Microsoft digital licenses (ESD). I worked with support from the Microsoft team in the process. We were recorded in time for sales and digital software distribution for the Microsoft partner program.

Tech Stack: HTML, CSS, JavaScript, React.js, Axios, Node.js, GraphQL, Tailwind, Bootstrap, SQL, WordPress, Apollo, Mailchimp, Shopify, Swagger.

Coderhouse.com, JavaScript Mentor — *FEB, 2020 - SEPT, 2021*
- I teach more than 25 students basic and advanced Javascript programming concepts per course.
- I finished the courses with 90% satisfaction of my students on the platform.
- I correct more than +40 exercises per week on time.
- I taught special classes oriented to agile methodologies and object-oriented programming.

Tech Stack: Html, CSS, JavaScript, Node.js.
